🔗 Personal Portfolio

Professional Experience

Data Scientist - Apprentice

09/2024 – 09/2025

Safran

Paris, France

- Designed and trained RNN/LSTM and Transformer models applied to time series for predictive engine health estimation using sensor data.
- Evaluated and optimized models using performance metrics and hyperparameter tuning (Python, PyTorch, Linux, CUDA, Pandas, Numpy).
- Developed a RAG system (Retrieval Augmented Generation) to enhance internal document search (LangChain, LlamaIndex, Qdrant, HyDE).
- Built workflows on AWS (CI/CD, Git/GitLab, deployment and model monitoring).

Data Scientist

01/2024 – 07/2024

Scaylab

Paris, France

- Developed recommendation and matching systems leveraging LLMs (LangChain, Qdrant).
- Designed and automated data pipelines on AWS (S3, Lambda, ECS) for dataset preparation and transformation.
- Implemented MLOps practices: Docker containerization, deployment on AWS, and continuous integration to ensure scalability and reliability.

Software & AI Engineer - Freelance

06/2022 – 01/2024

Symmetryk

Paris, France

- Developed and maintained applications (Node.js, Flutter, REST APIs) with integrated analytical features: visualization and reporting.
- Participated in the full software development lifecycle in an Agile Scrum environment, implementing Data Engineering & MLOps practices (testing, CI/CD, performance monitoring).

Data Scientist

06/2023 – 08/2023

CarNet

Paris, France

- Designed and implemented a recommendation system to guide users toward optimal vehicle maintenance centers using TF-IDF, KNN, and cosine similarity.
- Deployed the solution on AWS (S3, SageMaker, Lambda, ECS) ensuring scalability and production readiness.

Achievements

1st place in AI4Health Hackathon 🏆

05/2023

- Developed a decision-support platform to assess the severity of side effects from medications, designed for both patients and doctors.

1st place in OpenGovData Hackathon 🏆

04/2023

- Built a digital solution simplifying access to mammograms by streamlining appointment scheduling and promoting early screening.

1st place in Cardio Hackathon 🏆

03/2023

- Created an intelligent monitoring tool for vital signs to support treatment of patients with heart failure.

Education

MS Expert Big Data Engineer

Université de Technologie Troyes

2024 – 2025

Integrated Preparatory Program / Software Engineering

Esprit 🏆

2019 – 2024

Personal Projects

- Skill-based Curriculum Platform : Web scraping, NLP, recommendation system, visualization (Python, Power BI).
- Built an intelligent agent to automatically generate and send personalized emails using MCP, Mistral Le Chat, and Python.

Skills

- **Data Engineering & Processing** : Python, SQL, Spark, Hadoop, Airflow, ETL, Data Transformation.
- **Bases de Données** : PostgreSQL, MySQL, MongoDB, Neo4J.
- **Cloud & DevOps** : AWS (S3, ECS, Lambda, SageMaker), Docker, Git, GitLab CI/CD.
- **Data Analytics & BI** : Power BI, Tableau, Dataiku, Data Visualization,
- **Machine Learning** : RNN/LSTM, Transformers, NLP, LLM.

Certifications

- Microsoft Certified - Power BI Data Analyst Associate 🏆
- Microsoft Certified - AI Fundamentals

Languages

- Français / Anglais / Arabe - Professional and fluent
